

Health & Wellbeing Approach

The organisers of the GO Awards Scotland 2021/22 have put together the following approach to provide a safe space for participants attending the event.

Lateral Flow Testing

To help keep everyone safe we highly recommend that everyone attending (undertake a Lateral Flow Test (LFT) prior to arriving at the event. Anyone with a positive LFT test or feeling unwell must not attend the event.

Good Health

Anyone that is feeling unwell, or a little off colour should not attend the event and should stay away and seek medical assistance if required. We would also ask anyone who has been recently exposed to covid please undertake LFT test before attending.

Travel to the venue

Please follow best practice 'COVID Sense' when travelling to the venue, to ensure participants limit the potential exposure to covid prior to arriving at the Crowne Plaza.

Face Coverings

Unlike some other areas of the UK, within Scotland **a face covering (face mask) currently remains a legal requirement** when you are within the conference centre (other than when eating or drinking or if you have a medical exemption). If you have a medical exemption, we kindly request you wear an exemption lanyard/wristband or similar to highlight to our team members you have an exemption. This will prevent delegates being repeatedly reminded to pop their masks on which can become rather frustrating for the individual. (This requirement will be subject to further review on the 18th April 2022)

Hand Washing/Sanitising

Everyone is reminded of the importance of regular handwashing and or sanitising. To assist with this, the Crowne Plaza have numerous sanitising stations strategically placed in and around the building, including the entrance area as you arrive at the venue. Toilets/washrooms are all clearly signposted around the building.

Enhanced Cleaning

A stringent cleaning regime is in place with a focus on toilets, communal areas, hard surfaces and high touchpoints.

Personal Greetings

We would advise to still avoid handshaking or any physical contact, a simple verbal greeting remains more appropriate.

Physical Distancing

Although specified physical distances have currently been relaxed within guidance, we will continue to adopt physical distancing as a control measure as and when possible and appropriate. The table plan has been designed to ensure as much space in between tables as possible and fewer guests sat at tables.

Onsite Expectations

Any participant onsite should adhere by the guidelines where possible- not attending if they feel unwell, maintaining social distancing where possible, wearing face masks as advised and practising good hand washing/sanitising throughout the day.

What to do if a delegate develops covid symptoms whilst at the event

Any delegate should contact any member of staff and request assistance. They should provide details of the symptoms at that time.
